Professional Summary

I am a conscientious, motivated and curious graduate of the Skills City boot camp, during this intense 16-week programme, I gained many new technical skills, such as JavaScript, HTML, CSS, and Node.js to name a few, and learnt the behaviours needed to make a valuable contribution to a team with the tech industry. I am very passionate about developing professionally and am now seeking a role as a junior full-stack developer within an organisation that will allow me to reach my potential.

Technical Skillset

Technologies:	**HTML5, CSS3, JavaScript, Node.js, Python**
Databases:	**Firebase, MySQL, Postgres**
Frameworks:	**React, React Native, Bootstrap, Jest**
Version Control:	**Git, Github**

Education

Feb 2024–April 2024	**Bootcamp Graduate** Skills City
May 2023–August 2023	**Level 6 Diploma in Web Development** Code Institute (Credit Rated by University of Southbank)
November 2021–March 2022	**Bootcamp Graduate** School of Code
September 2017–June 2019	**Level 4 Management Certificate** University of Kent, UK

Collaborative projects

1. **Bootcamper Portal -** A website built to enhance the experience of fellow bootcampers. **Technologies Used** - HTML5, CSS, JavaScript, React.js, Node.js, Postgres, Heroku and Netlify for hosting and deployment. **Live Site - https://heuristic-johnson-b3e4f3.netlify.app/**

2. **MyTribe -** A mobile app primarily created to help organise domestic chores between family members. **Technologies Used** - HTML5, CSS, JavaScript, React Native, Firebase. **GitHub - https://github.com/SchoolOfCode/final-project-repo-node-of-ingenuity-room-17**

3. **News App -** This was made during the Niaxo hackathon, testing our React and REST API knowledge. **Technologies Used** - HTML5, CSS, JavaScript, React, Node.js. **GitHub -** https://github.com/zulfiya-yumagulova/hackathon-news-app

Portfolio projects

1. **Weather App -** My first solo project using React and testing REST API's. **Technologies Used** - HTML5, CSS, JavaScript, React, Node.js.
2. **SneaKlean -** My first Bootstrap-focused project. This was my Milestone Project for Code
3. Institute. **Technologies Used** - HTML5, CSS with Bootstrap. **Live Site -** https://afabor.github.io/CI-Milestone/
4. **Jade Dragon Gym** - Another app created using Bootstrap to practise bootstrap grid. **Technologies Used -** HTML, CSS with Bootstrap. **Live Site** - https://afabor.github.io/Gym-App/

Work Experience

November 2021–Present   **Ocado, Personal Shopper/PPT Driver**

- Objective and target-based work.
- Checking the temperature of products and logging them on Google Docs.
- Working efficiently and independently.
- Having my individual actions impact a team positively.

October 2020–November 2021   **Co-Op, Customer Team Member**

- Good communication with customers.
- I am accustomed to high-pressure working situations.
- Managing different tasks simultaneously.

Interests/Additional Information

- Participation in several Hackathons.
- I attend regular in-person and online tech networking events.
- Playing drums in church.
- Producing music on Mac and Windows OS.
- Regular at the gym/general wellness activities.
